

# HyperSync Core Tier - Dual Licensing

---

HyperSync Core tier is available under a dual licensing model:

## 1. AGPLv3 License (Open Source)

---

For open-source projects and non-commercial use, HyperSync Core is licensed under the **GNU Affero General Public License v3.0 (AGPLv3)**.

### Key Points:

-  Free to use, modify, and distribute
-  Must disclose source code
-  Must use AGPLv3 for derivative works
-  Network use triggers copyleft (AGPL provision)

See [LICENSE](#) (LICENSE) for full AGPLv3 text.

## 2. Commercial License

---

For commercial/proprietary use where AGPLv3 terms are not suitable, a commercial license is available.

### Benefits:

-  No copyleft requirements
-  No source code disclosure required
-  Can integrate into proprietary software
-  Priority support available

**Contact:** [Add contact information for commercial licensing]

## Why Dual Licensing?

---

- **Protects open-source community:** AGPLv3 ensures contributions remain open
- **Enables commercial use:** Commercial license allows proprietary integration
- **Prevents theft:** Strong copyleft prevents unauthorized proprietary use
- **Sustainable development:** Commercial licensing supports ongoing development

## Which License Should I Choose?

---

### Choose AGPLv3 if:

- Your project is open-source
- You're comfortable with copyleft requirements
- You want to contribute back to the community

### Choose Commercial License if:

- You're building proprietary software
- You cannot disclose source code
- You need to avoid copyleft obligations
- You want priority support

For questions about licensing, please contact [licensing contact information].
